

Dear Sirs,

Amatuer radio operators and Shortwave radio listening enthusiasts already have lots of interference to cope with; without having BPL in place. I urge you to please reconsider allowing BPL to become a reality. If it does, many of America's radio related hobbies will suffer a great deal. Radio related hobbies like shortwave listening is a great hobby that doesn't bother anyone: why would anyone want to jeopardize it? Please don't allow BPL to ruin everything for the shortwave listening community.

Thank you,

Al Milano KC2BAE
